

Land Ahoy!

Year 2 decided to build boats as part of our topic "Land Ahoy".

We experimented with different materials to see what floats and what is waterproof. Using our results, we decided what material would be best to build a boat with.

Wood was found to be the best material so we created our designs, gathered our materials and tools then built small boats.

Then we tested our boats by seeing how much weight they could hold on water. They didn't work as well as we had thought, so we added tin foil which made them float so much better!

We've been reading the story "How to Find Gold" by Viviane Schwarz and created our own story books of alternative ways Anna and Crocodile found the treasure. Our published books can be found in the book corner.
